

**Marcia Berman**

College of William and Mary  
Virginia Institute of Marine Science  
Center for Coastal Resources Management

Marcia Berman directs the Center for Coastal Resources Management's Comprehensive Coastal Inventory Program at the Virginia Institute of Marine Science. Marcia's professional interests reside in the applied sciences; specifically within the coastal zone. The mission of her program is to develop science-based decision support tools using GIS and remote sensing technologies to enable coastal managers to improve their capacity to make better management decisions. She has active research initiatives in the areas of shoreline management, shallow water use conflict, restoration and protection of critical coastal ecosystems, sea level rise modeling, and climate change adaptations.
